

NIVUS - best of flow

NIVUS - Instrumentation for Water Industry

best of flow

The best from all areas of instrumentation for the water industry: the best measurement methods, the best know-how and a brand-new generation of devices! All the most important measurement principles consolidated, you can find this only at NIVUS!

We are a worldwide leading developer, manufacturer and supplier of measurement systems. Our product range comprises metering devices for flow, level and water quality as well as telecontrol systems. Moreover we carry out demanding urban drainage measurement projects.

The suitable solution for each application. Tried and tested measurement systems to perfectly fit your needs. Measurement systems which measure right what they should, reliably and accurately – even under difficult conditions. This is our claim!

Wide Range of Measurement Systems

We provide the suitable method for each application and each medium

Cross Correlation

Transit Time

Radar

Doppler

Hydraulic

Variety of Sensors

Suitable for each application - we offer the widest range of sensors in various designs.

Measurement Systems

Easy-to-operate transmitters with integrated numeric models.

Intelligent transmission of measurement data and software solutions

From GPRS Data Loggers up to complete process control systems.

Competent Advice

Our experts are able to draw on many years of experience of measuring in the water and wastewater area. This allows to develop the best possible solutions for your applications.

Your Benefits

- Accurate and reliable measurement results
- Perfectly dimensioned measurement systems
- Saves costs thanks to quick and easy installation and commissioning procedures
- Low personnel expenses through integrated systems
- One competent contact person for all components

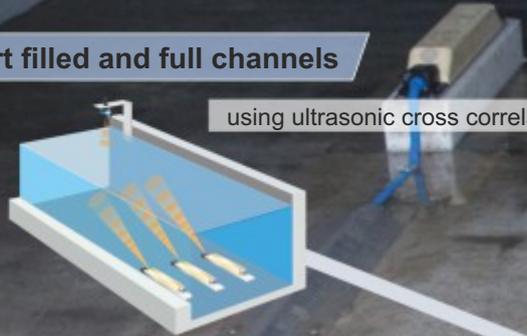

best of flow - for each Application

Whether sludge or water, part filled or full, small pipe or large channel - at NIVUS you will find always the appropriate measurement system for flow measurement.

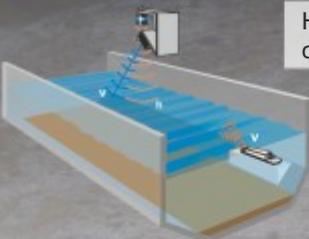

Part filled and full channels

using ultrasonic cross correlation

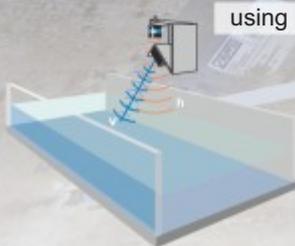

Part filled and full channels

Hybrid measurement system using cross correlation and surface radar

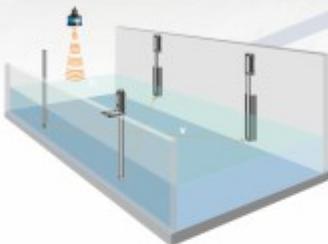

Part filled and full channels

using surface radar

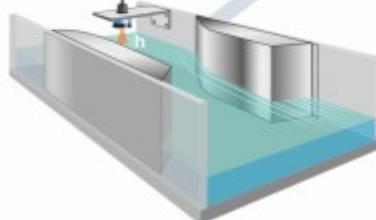

Irrigation/drainage channels, rivers and cooling water

using ultrasonic transit time

Venturi

using ultrasonic level measurement

Full pipelines

using clamp-on transit time

Weir flaps

using inclinometer and hydraulic calculator

Full pipelines

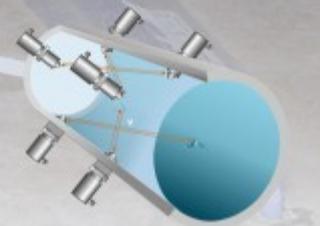

using ultrasonic cross correlation

the affordable alternative to EMFs

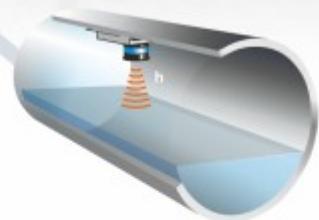

Full pipelines

using ultrasonic transit time

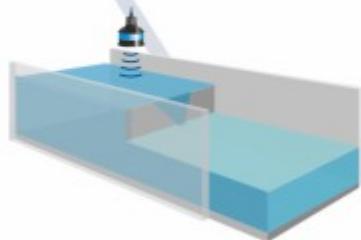

Gravity lines

using ultrasonic level measurement

Measuring weirs

using ultrasonic level measurement

Part filled and full pipes

using ultrasonic Doppler

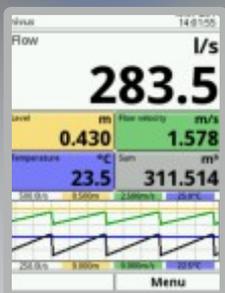

best of flow - NivuFlow

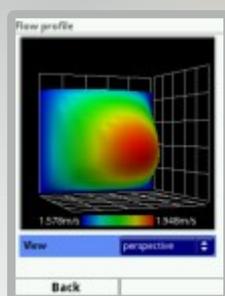

- Compact and powerful transmitter in various designs
- Integrated numeric flow models
- Various measurement methods can be combined
- Universal interfaces for easy connection
- Quick wiring thanks to easily accessible connection points

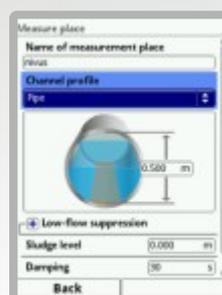

Screen display menu

Screen display main screen

Screen display 3-D flow profile

Screen display measuring place

- Quick and easy installation and commissioning procedures
- Intuitive clear text menus in dialog mode
- Comprehensive diagnostic functions for commissioning and maintenance

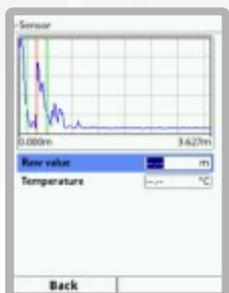

Universal transmitters with intuitive operating concept

GPRS data logger for easy data management

- Unlimited access to your measurement data
- Efficient data transmission and data management

Screen display level sensors

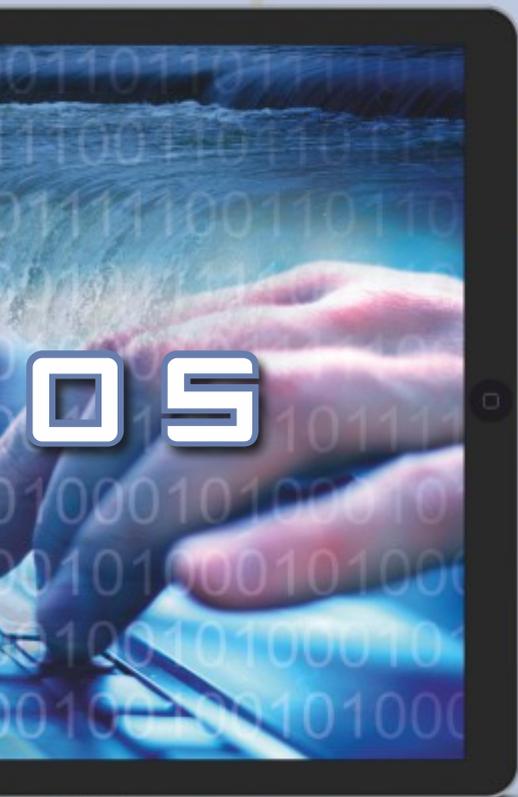

NICOS - Process Control- and Telecontrol Software

The NIVUS telecontrol and software system NICOS provides tailored solutions for the water industry.

The "NICOS Studio" engineering tool allows to comfortably adjust the representation - without programming skills.

OS

Your Benefits

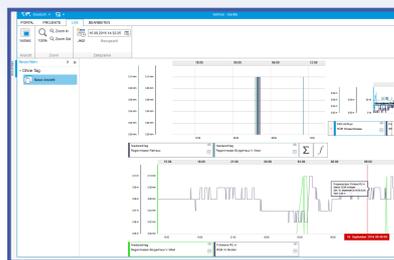

- Comprehensive advice from the measurement place through logging based on local laws and regulations
- Scalable solutions, tailored to your requirements and applications
- Economical migration thanks to flexible adaptation options
- Optimised for mobile devices - data access if required
- Individualisation through NICOS-Studio without programming skills
- Easy integration of existing structures since all common PLC and telecontrol protocols are available
